We source affordable and good quality instruments for farmers & foot-trimmers.

Hoof Knife Sharpener

1 of the 7 wonders of the foot-trimming world, as regardless of how you slice it, dull knives are dangerous! From cutting vegetables to cutting meat to hoof-trimming cows' feet, the overarching principle remains the same. You shall need a quality knife with fine edge for today's or next week's visit.

A dull knife can bounce and deflect, unfortunately the result can be catastrophic, bloody hands or even bloody hooves. A razor sharp hoofcare knife on the other hand, is safer, controlled with minimal effort and has a longer lifespan. Counteract the wear and tear on your tools from stones, sand and dirt with a sander that is easy to haul around. Touch them up in a minute, set-up easily anywhere where work takes you. Always sharpen the single-edge knife from the inside (rounded-side) and use the thin sanding disk to polish the knife.

In summary, a little and often, only takes a few minutes...

MastDecide Test Kit Incubator

This incubator is top of the range and is the official complement to the MastDecide on-farm mastitis test.

It maintains a constant temperature of 37 degrees Celsius, in order for the testing to be carried out.

MastDecide Test Kit

12 hours later - Reduce antibiotic use and get results on-farm

MastDecide is a reliable milk test for mastitis in dairy cows and is designed to be carried out on farm.

It is aimed to:

1. Reduce antibiotic use
2. Decrease wasted milk
3. Return results as Gram(+), Gram(-) or No Growth
4. Produce an outcome within 12-14 hours

Consult your vet and farm assurance plan for the best choice of treatments on different types of mastitis.

You shall also need an egg incubator that maintains a constant temperature of 37 degrees Celsius, in order for the testing to be carried out.
